

# Anaiysaa Deswal

Seattle, WA | 425-362-9708 | [adeswal@purdue.edu](mailto:adeswal@purdue.edu) | [linkedin.com/in/anaiysaadeswal/](https://www.linkedin.com/in/anaiysaadeswal/) | [anaiysaa.github.io/my-portfolio/](https://anaiysaa.github.io/my-portfolio/)

## EDUCATION

### Purdue University

B.S. Computer Science, Minors: Math, Political Science, Entrepreneurship - GPA: 3.5

West Lafayette, IN

Aug. 2024 – May. 2028

Concentrations: Machine Learning, Computer Engineering, Software Engineering

#### Relevant Courses:

- Foundations of CS & O-O Programming, Programming in C, Computer Architecture, Data Structures & Algorithms, Systems Programming, Multivariate Calc, Linear Algebra, Ordinary Differential Equations, Probability Theory

## SKILLS AND TOOLS

**Programming Languages:** Python, Java, C, C++, SQL (Postgres, Azure), JavaScript, HTML/CSS, R, Assembly

**Frameworks, Libraries, & Tools:** React, Flask, PyTorch, TensorFlow, Git, CI/CD, Azure, AWS (CDK), Docker

## TECHNICAL EXPERIENCE

### Johnson & Johnson - Purdue Data Mine Corporate Partners

West Lafayette, IN

#### MCS Developer

Aug. 2025 - May 2026

- Built a Monte Carlo simulation web application to probabilistically forecast clinical trial enrollment timelines across global sites, improving forecasting accuracy to reduce trial delays. (React, Python, Gemini CLI, Agile)

### Purdue University - Vertically Integrated Projects

West Lafayette, IN

#### PPML Undergraduate Researcher

Aug. 2025 – Dec. 2025

- Extended influence function research for privacy-preserving ML, adapting TensorFlow pipelines to calculate training-point influence and loss sensitivity across non-convex models. Integrated it into Landseer multi-stage ML defense pipeline to quantify training-set attack susceptibility.

### Quadrant Technologies

Redmond, WA

#### Software Engineer Intern, Team Lead

Jun. 2025 – Aug. 2025

- Managed team of 9 with project organization for design and development of a company portal application (React, Flask, Python, SQL); Enabled real-time analytics with scalable data pipelines to process 5k+ employee records.
- Integrated Azure AI Services (GPT-4, Deepseek R1) for semantic search, text classification, document parsing, and chatbot via prompt design, context orchestration, and RAG workflows.

### Adapts.AI

Seattle, WA

#### Software Engineer Intern

May 2025 – Jun. 2025

- Conducted code security audit of company AWS CDK libraries, refactoring code for vulnerabilities and best practices, and authoring developer documentation to streamline onboarding and reduce code review time.

### Northwest Nuclear Laboratories

Federal Way, WA

#### Laboratory Technician

Feb. 2022 – Jun. 2024

- Engineered data pipelines (DAQFactory & Azure) for reactor telemetry, accelerating research analysis; Built LabJack control systems managing thermionic emission, plasma levels and radiation output for BCNT research.

## LEADERSHIP EXPERIENCE

### Purdue Women in Science Program (WiSP)

West Lafayette, IN

#### Computer Science Team Lead & Social Media Liaison

May 2026 – Present

#### Mentor & Social Board Member

Aug. 2025 – May 2026

- Organized 8+ community-building events with the Social Board for 200+ WiSP participants in 2025-2026.
- Mentoring first-year STEM students, providing academic guidance and career support.

### Women Advancing Tomorrow's Technologists (WATT)

Seattle, WA

#### Student Advisory Board Member

Aug 2024 – Present

#### Core Team Lead & Coding Instructor

Sept 2022 – Aug 2024

- Led a team of 6 students to design, deliver, and market eight-week classes in Python, HTML/CSS, and Arduino for K-8 girls, growing membership by 35%. Worked with 6 schools to manage 90+ students & 25 volunteers.

## PROJECTS

### MIA - TinyML Personal Desk Assistant | Python, PyTorch, TFLite, Raspberry Pi

May 2026 - Present

- Designing and training a binary audio classification CNN from scratch for custom wake word detection. Deploying quantized TFLite model on embedded ARM hardware alongside offline speech recognition, intent classification, and live API integrations for calendar and other personal notification services

### OOTD - Virtual Closet App | Python, Supabase, React, FastAPI

April 2026 - Present

- Building a full-stack wardrobe management app enabling users to catalog clothing, build outfits, and organize mood boards, with Python backend with cloud storage. Integrating AI-powered image analysis with web scrapping for automated personalized clothing recommendations and best price search from retailers and resellers.

### Personal Portfolio Website | React, JavaScript, HTML/CSS

Dec. 2025

- Designed and built a responsive portfolio website featuring interactive UI components and a contact request system, showcasing projects and technical experience using React and JavaScript.
